MR STLWARTS MOTIVE

Two motives is we induced Mr Stewartto make this proposed distribution of his property is his life time. Enst, he wishes to be the aimoner of his own charters. It is shreadness and industry ranged his property, and he feels as if nobody was so well qualified to distribute his property was himself. But underlying all this is his pride as an American. Mr Peabody's donations have evidently had its influence on Mr Stewart. He says that we ought to do in America much better than mything done, in the Old World, that as he his made all his money in America, he, intends to devote all that his family do not need to the honor of America. And his plans are so carefully materied that the pit will not only be a model in or of America. And his plans are so en matured that the hit will not only be a male amount, but in the manner in which it rested.

General Grant's visit to this elty is understood to have been for the purpose, in his capacity as a private clitzen, solicitous of preserving the peace, to make to the Folice Commissioners of Bultimore, at the instance of Governor Swann, the following propositions:

First, that cach set of Commissioners call separate polis, to be opened in the several election districts, and receive such voice as may be decided legal by their judges of election, and have these voice classified and centified to the State Legislature and to Congress.

The Folice Commissioners respectfully declined to entertain this proposition, as it would be contrary to the election laws of the State, and that by accepting it they would be guilty of worse malfeasance in office than any that had been charged against them; that it was their purpose to conduct the election strictly in accordance with the provisions of the law and Consilination of the State, and that it was not in their power to make any agreements that condicted with the law.

The next proposition made, was sub-tantially as follows:

power to make any agreements that conflicted with the law. The next proposition made, was substantially as follows:

That heold the Police Commissioners appoint one Conservative Judge of the Bur to appoint at each of the polls; that these Judges receive the votes of those who present themselves and who are found to be upon the soverall registers; that two sets of bullot-boxes be need, in one of which are to be deposited the votes accepted, and in the other the votes rejected.

The first part of the proposition was simply in accordance with the piedge made by Mr Alexander before Governor Swann, while the charges against the Commissioners were being investigated, it was made then, as a concession by the party in power, to the cunservatives, with the view of preserving peace. The commissioner having already amounced officially in the morning papers that they would appoint one judge and one clerk in each presenct from the conservative party; of course there was no objection to it, the remainder of it being covered by the provisions of the registry law.

The particulars of the selzure of arms is os follows, as new can be ascertained. Upon information reactived at the Police Commissioner's office, that certain parties were engaged in preparing to restet their authority by force of arms, and that certain infividuals were then engaged in preparing to distribute arms for such re-distance, and that these parties were in an upper story of Bonnet's auction house on Chirles streef. They agent thicker Marshall Charmlehard with a strong force of poince and at once took possession of the establishment. On forting an entrance to the room, in which they found some lifteen parties actively engaged in leading a large lot of Belgian musters which had been altered into minnight in the street and attempted to shoot the Marshal. The Marshal threw up the weapon, knocked the main down and carried them all to the station house. The arms and ammunition, consisting of muskets, a key of powder, tile baits and piatel tails were also removed to the police station. Unfortunately, in putting the marsket into a furniture wagon to carry them, one of them was discharged and shot a citizen in the face, severely, though it is hoped, not istally injuring him.

A great difficulty has been severely felt in many wells throughout the off country by a continuous flow of gas. The want of some appliance to obviate this difficulty has been severely felt, and many wells after an outlay of thousands of dollars have to be abandoned , the gas escaping in large quantities seriously impedes th working of the valves, and consequently largely decreasing the yield of oil, in some cases entirel preventing the working of the valves. well need be troubled by a flow of gas. By using an improvement that has been shown us, that whom once understood must commend likelf to every one, any way connected with oil wells, this conseded that the greatest accumulation of gas is in the well immediately below the seed bag, as he tendency of the gas is to rise and excape at the surface. When the gas fills all the cavity below the seed har, then it descends and escapes through the valves in the working-barrel, thus preventing the vilves from working. Any ap pliance that will camble the gas to escape without detriment to the working valves is the desid This has been accomplished and consists of simply a coupling secured on the first joint of the lubing below the seed bug and then securing the tabing below to it. Through this coupling the sucker-rods freely pass. At its side valve, which the inventer cills a release

seed bag, when there is a pressure of gas, the valve opens and allows the gas to escape, thereby relieving the pressure from the working valve and jet it is not lost. The gas entering the acts as a propeiling force, and assists in lifting the weight of fluid in the tube. When a well is inclined to flow, this valve will very materially assist it, as the fluid is lifted above this valve by he gas. A vacuum is formed in the tube below. and the fluid must rise to fill it. This value cap e of no possible detranent to any well, w sucker rods pass through it without any resistance, the valve being at the side which will al ways be closed, unless opened by a heavy pres

surc of gas. This appliance is the invention of Mr Dide, o tochester, New York, and is manufactured at Eric. Pennsylvania. It is ingenious, cheap and simple, and its beneficial qualities should duce it into every well that is being tubed. Per sous wishing to examine it can do so by calling on M. William Platt, at the Atlantic Hotel, in this city.

Landlord and Tenant.

REPORE ALDERMEN MOWBRAY AND STROUBE George W. Wolf vs. Lean Duplanti, hefore a jury of twelve freeholders, Nov. 3 1866.—In the nature under which these proceedings are taken the landlord or purchaser may, after the acknowledgment of a deed, (in open court by the Sheriff, if bought at Sheriff's ealt), give notice requesting the sarrander of the premises. Proof eing then made before two Justices of the Peace and a jury of twelve freeholders, first of the purchase, second of the person in possession, being the party of whom it was bought or holding under him, and third that three months had elapsed since the notice was given, the Justices may then

order summary removal of the tenant In the present case the notice was given before the Sheriff's deed had been acknowledged, but the counsel for the plaint of Clark Ewing and Ita Pierce, assisted by B. S. McAllister, Esq., reiled on the fact, that as the premises were on leased ground and in the nature of a chattel real, instend of real estate, and as a deed was mere surplusage to increase the Sheriff's costs, giving no better title than the netual sale by the Sheriff, therefore, a notice served after such sale was the same as a notice would be where real estate was sold after the acknowledgment by the Sheriff in open court : and the gass 2 Harris p. 90 Sawers vs. Vie, was cited to prove the title was not improved by a Sheriff's deed, and the inference was saked of the Instices and the jury that a notice after the title was complete, was a compliance

with the etatutes. J. H. Baker, for the defendant, contended the if the summary proceedings conferred by this statute were set in motion to disposess his client, then the words of the statute must be literally complied with, the notice to be legal must have compiled with, the notice to be legal must have been selved after a deed had been selved without a tut if the premises in dispute passed without a deed being acknowledged in open court by the

Sheriff, then these proceedings under this statute FINARULAL AND COMMERCIAL CROSEY OPERA HOUSE liers, however, was a deed, a deed that had been PINARULAL. schnowledged in open court; there was the date of its acknowledgment, the proof of actice, had been given ; it was subsequent to the acknowldgment, and the case therefore fell through A long discussion, and some argument energe Counsel Pierce designated the defence pettifogs fit among the passers by, show that the city's boxee. The plaintiff's coupsel put on their hats and Justice Monbray commenced summing up, which speedily removed the bats from the counsel's heads, and caused the buttons to slip back through the button-holes. Steam being thus let off, the defendant was called by plaintiff's counset to prove he still lived at the Montreal House the premises in dispute; cross examined, he added, with his son-in-law, and a long discussion canned as to ble eligiobility as a witness for the do fence after being ceded by the plaintiff. Other witnesses were called, and it appeared that de fendant's son in law had loaned him money, had received a bill of sale for the property at the suggestion of Mr. Chase, the owner of the landate secure the son-in-law's advances. Counsel Clark Ewing addressed the jury, reiterated the points, ridiculed the transfer or sale to the son-in-law and then counsel Ira Pierce read some charges to the jury which should have been asked of the Court to charge the inry, and after half as hour's retirement the jury found in favor of Mr Bakers view that the notice was illegal and gave a verdict for defendant. MEM .- Had there been no pitching in, and

throwing back of counsel, there would have been less fun for the jury, compensated by a saving of four hours' time to eighteen persons. As it was removed; and they stripped of their the case occupied six mortal hours. May this hur achivi.
